Department Introduction & History

Our school was originally called the Department of Cultural Industries (established 2003), but changed its name to the Graduate School of Beauty Convergence in 2016. The Beauty's Skincare & Obesity major is based on the Graduate School of Cultural Industries' Skin care & Obesity Management major that was set up in 2003.

The Skincare & Obesity major is a course to train experts in the beauty-related industry who aim to pursue beauty through skincare and health care. Based on relevant academic disciplines such as nutrition, dermatology, anatomy, and physiology, we seek to foster high-level experts in the field of aesthetics. After completion of the program, students will lead global trends by pursuing healthy beauty and improved quality of life through medical skin care, spa, obesity management, and aromatherapy.

In response to the global trend of increasing desire for a beautiful and healthy life, the Skincare & Obesity major focuses on nurturing experts in skin care, obesity management and eco-beauty industries. The program pursues multidisciplinary research related to skincare and healthy beauty including inner beauty, aesthetics, medical grade skincare, aromatherapy, and spa. We also invite authorities in each field to open a variety of practical courses to encourage experts to contribute to the development of new technologies for the skincare industry and the development of the industry itself.

Department of Education and Specialized Goals

Faculty Members

NAME	MAJOR	RESEARCH ACHIEVEMENTS	E-MAIL & EXTENSION NUMBER
BAE HYUNSOOK	CLINICAL NUTRITION	Nutritional and antioxidant status by skin types among female adults.	hsbae@sungshin.ac.kr 02-920-7558

Development in the Direction of the Department

The Graduate School of Beauty Convergence will focus on specialized fields that will lead K-beauty trends and strengthen competitiveness by securing excellent students. The program will produce professional talent by providing students with the best education and expand education services that prioritize their demand. By subdividing this goal in the fields of education, service/entrepreneurship, and policy/system, we aim to take the practical lead in enhancing dual competitiveness by operating a one-stop education system and in-depth curriculum for essential majors in the beauty /health field. In addition, we will strengthen our status as an institution specializing in nurturing professionals to secure our position as a prestigious educational institution. We aim to establish successful routes in each field through evaluation and complement from active networking between graduates and undergraduates.

1) Certifications that can be acquired

Esthetician (skin), Esthetician (nail), Esthetician (make up), Skin care therapist, Hospital coordinator, Body shaper, Medical esthetic consultant, Natural fragrance perfumer, Aroma therapist, Dietary instructor, Atopy counselor, Spa therapist. Waxing Therapist.
