

SUNGSHIN
WOMEN'S UNIVERSITY

Department of Psychology

Department of Psychology

About the Department

Psychology is the scientific study of human thought, emotion, and behavior, and it originated from a deep understanding and interest in human beings. Within psychology, there are basic research fields such as personality psychology, social psychology, physiological psychology, learning psychology, developmental psychology, experimental psychology, cognitive psychology, and quantitative psychology, and applied fields such as clinical psychology, counseling psychology, and industrial and organizational psychology.

Psychology is a fundamental discipline in the social sciences and humanities, and an understanding of psychology is essential for other fields that deal with human beings, such as law, management, and medicine. If you major in psychology as an undergraduate, you can use your knowledge of psychology in your work and in your relationships.

Educational Goals

- Understanding human nature
- Exploring practical knowledge
- Fostering a spirit of service and engagement
- Training professionals and creating jobs in the field of psychology

Desired Student Characteristics

A person who contributes to promoting a sense of well-being for individuals and society through an interest in human beings and a systematic understanding of human thought, emotion, and behavior.
