Department of Crafts

Academics

Department of Crafts of Sungshin Women's College focuses on connecting the traditional beauty to the modern trend by tapping into the principles of representation and instilling in students the esthetic sense of contemporary craft by developing and using new techniques. Especially, with sub-specialties of metal craft, ceramic craft, and textile craft, the program provides the opportunity to deepen individuals' uniqueness and creativity.

Educational Goals of Departments

Exploring representation and studying and developing new materials and techniques.

- Fostering professional craftspeople with learning subcategorized into metalwork & jewelry design, ceramic art (product design), and textile design (textile design).
- Fostering craft designers equipped with artistic sensibility and creative skills who can understand the characteristics of traditional and modern craft and respond to the needs of the times.
- Cultivating specialist skills that can fulfill social contribution through developing professional design skills.

Students Envisioned by Departments

Professionals who build on their representational and design skills to practice craft art and realize an artistic life
