

Department of Beauty Industry

Academics

The Beauty Industry Department aims to foster creative professionals in the beauty sector by providing integrated education in specialized knowledge, aesthetic development, and theoretical and practical training. The curriculum covers foundational studies in cosmetics, dermatology, and makeup, while enhancing applied skills in areas such as marketing, trend analysis, and design. Through specialized practical training, the program aims to improve practical techniques and cultivate the ability to explore new genres and expand the concept of creative beauty. Industry-connected educational programs strengthen competitiveness, producing talented individuals capable of entering global markets in China, Vietnam, Hong Kong, Malaysia, Europe, and the Americas.

Educational Goals

- Cultivate versatile professionals with specialized knowledge and competitiveness.
- Train artist experts with planning skills and artistic sensibility for leadership in the beauty industry.
- Develop creative beauty industry experts with a balance of theory and practical skills.
- Foster beauty industry professionals with global competitiveness.

Students Envisioned

- A creative and interdisciplinary global talent equipped with expertise and artistic skills to lead the beauty industry.
